

# MAP TWO: Management Zones and Sectors

SOUTH POLE  
ASMAV

**Geographical Framework Notes:**

Ice and facilities at the South Pole move at a rate of ~10m per year. Therefore a Local Grid is used to define ASMA Zone and Sector boundaries. Local Grid bearings remain consistent relative to facilities at the Pole. Zone and Sector boundaries move with the Local Grid. Local Grid North aligns with the Greenwich meridian (0°). The offset of the Local Grid from the true geographical grid changes over time.

- Station Buildings
- Station and South Pole

- Operational Zone
- Hazardous Zone: AUTHORIZED PERSONNEL ONLY

- Vehicle Trail
- Ski-way: CAUTION

Data: United States Antarctic Program, 26 February 2007.
